The color and density of the polyurethane varies / Therefore, it is impossible to guarantee a consistent uniform imprint. Although we feel our imprint quality is the best in the industry, a certain amount of distortion is unavoidable, especially on the Globe. We will make every effort to recommend the best layout of your ad copy for maximum quality / 2nd location imprint is not registered with the 1st location imprint. The positioning on the 2nd side may vary depending on the artwork. Factory will recommend the best position / Due to the limitations of imprinting on a porous soft material, PMS colors are not possible to match / Factory must approve artwork / These products are not safe for children and are not intended for use by children or pets.

DISCLAIMERS

Intellectual Property: Products and logos shown in this catalog appear only to illustrate the basic products and their ability to include an advertising message. They are never intended to suggest that the imprints were designed by this company. The products with those specific imprints are not readily available to any purchaser without permission of the owners of the trademark or copyrighted art or copy.

Catalog Photography & Color Use in Catalog: Due to photography lighting, the color of items in this catalog may appear different than the actual item. This is especially true for translucent and neon items. (We strongly recommend that you request a sample to see exact color.) Neon colors will also appear different in the photograph because neon inks are not used to print the catalog.

Errors & Omissions: We reserve the right to correct any errors in our images, descriptions and pricing at any time without prior notice.

DRINKWARE IMPRINTING

- Most Drinkware items can be printed with a two sided or wrap layout. Two sided imprint is most common, with two images whether the same or different. Images are spaced on opposite sides of each other within the standard imprint area.
- Two sided imprints allow you to see imprint at a

Terms & Conditions

glance.

- Wrap imprint is usually used when the artwork is much wider than it is high and will be a continuous print around the item, with one gap between the beginning and end of the artwork. Items with wrap imprints must be turned in order to see the entire imprint.
- Color Surge drinkware items are limited to a one sided imprint only.
- One side imprint is recommended on clear drinkware items, as printing on opposite sides will visually interfere with opposing logos.
